MONEY MARKET. SATURDAY, March 13-6 P. M.

The stock market remains without material alteration. Speculation has not yet reached its culminating point, and the bulls have apparently as much confidence as when prices ranged ten per cent below current rates.
This is perhaps well enough for the time. At the first board Morris Canal advanced % per cent; Reading Railroad %; all others closed about the same. The market is sustained entirely by Wall street influence, and nearly all the transactions are among the brokers. The inflation of United States Bank has been caused by the movements reently made by foreign holders, and the efforts about being made to wind up the affairs of the institution. There will be a meeting of the stockholders in Philadelphia, on Friday, the 19th inst., to hear the report of the semmittee appointed to consider the policy of making a general assignment of the assets of the bank. Mr. Schwab, of 61 William street, agent of the Dutch and English bolders, will receive the proxies of parties in this country who will be unable to attend, but who are desirous that holders, represented by Mr. Schwab, are desirous of winding up the affairs of the bank at once, and if there is

anything left for the stockholders give it to them.

Previous this year. \$6,553,069

Total, January 1 to March 13, inclusive..... \$6,862,975 The small shipments this week and last, keep down the aggregate. So far this month, the exports have been considerably less than for the corresponding period in 1851. It is most desirable that this moderate amount of specie should continue for some time, to equalize the shipments more with those for the early months of last year.

The New Jersey Mining and Exploring Company and the Sussex Zinc Company having been united by autho-

rity of the Legislature, the stock of the latter is worth the same price as the former, and amounts to the same thing. The capital stock of each company is \$600,000, making a total of \$1,200,000, divided into shares of \$12.50 each, and the last sales at the board are quoted at \$12 25. The company is now making their celebrated gine oxide paints, which they believe will ere long entirely supersede the lead paints, both on account of their healthfulness and durability.

The Penusylvania canal opened for navigation at the appointed period. Boats have left Harrisburg for the West. An immense business has been awaiting this opening, and the canal will be fully employed. The merchants of this city can now forward all the goods they have, and they will be promptly put through.

The interests of the U. S. Bank received another unfavorable blow a day or two since. In the Court of Cour-mon Pleas it was decided that not only the assets in the hands of the several trusts created by the Bank of the United States, amounting to some \$15,000,000, but all property whatever, assigned for the benefit of creditors, are liable to taxation for State and county purposes. Notwithstanding these adverse decisions by the courts,

the stock of the bank is steadily on the rise.

INDIA RUBBER GOODS.

RUBBER CAR SPRINGS.—THE FOLLOWING ADditional testimonial to the merits of F. M. RAY'S india Rubber Car Springs, over all others, has just been received. It needs no comment:—Hudson River Hailroad Office, 68 Warren street, New York, March's, 1822. F. M. Ray,
Esq.—Dear Sir: Since my connection with this road, I have
watched with much interest the matter of Rubber Springs
for railroad cars, and have no hesitation in saying that your
spring is incomparably the best article which I have seen or
used. I have tried others, and found them to fall under
pressure, or to freeze in cold weather, and become worse
than useless. I should prefer using yours at double their
cost, to employing any other rubber spring which has fallen
under my notice. Your Springs possess the rare quality of
preserving their clasticity at all temperatures. Yours, Sec.

Late Superintendent of the Hudson River Railroad.

Read and Buile, The IRVING Building and Mutual Loan Association wilhold another Public and Mutual Loan Association wilhold another Public METING, on Tuesday evening, March 16, at Masonic Hall, No. 274 Grand street, near Forsyth street, at 75,0°clock. An address will be delivered by W. T. B. MILLIKEN, ESQ., and others, explaining the objects and workings of these beneficial associations, and showing how a person can obtain a house which he may call his own, and which he can procure for the same money that he is now paying for rent, by paying the same amount in small sums monthly in this association. There is no place like home, when you become old; the force of which was never more felt than at the present time, when the rents area enormously high that it is almost impossible for a mechanic or laboring man to pay them. Hesides, they grow higher from year to year. These lacts are sufficiently important to induce every rent payer to seeme a home of his own higher from year to year. These lacts are sufficiently important to induce every rent payer to seeme a home of his own for his family. Persons who do not wish to obtain a house, by paying into this association, in sums of \$3 per month, or \$252, will, in a few years, receive \$500 in return, with which they can commence some small business, and thus achieve their own independence. Ladics and gentlemen 2rc invited to attend and learn how they may become rich. Entrance fee, \$2 dues, \$3 per month; shares, \$500.

Practical Use of Astrology. We know by scriptural proof that the Chaldaic Alagi, and the soothsayers and augurers of tayth, Rome and Asyria, did fortell future events. It is difficult to see, therefore, why we should deny the possibility of the same supernatural act being exercised with equal accuracy at the present day. All other arts and sciences have been improved upon since that day, and why not astrology. "The borning stars of night" have been supposed, by the greatest men of all ages, to influence the destinies of men. There is now a distinguished Swede residing in New York, the descendant of a line of astrologers reaching back for centuries, who professes to read and to translate the language of the stars. We refer to Dr. Roback, of No. 6 White street, the fame of whose predictions, or, rather, of their accomplishment, has spread far and wide. His impression is, that he derives this extraordinary faculty, or that part at least, from being the seventh son of a seventh son. Be this as it may, it is not denied that he gives advice by which all the varieties of disease are removed or cured-dots collected-worldly prosperity secured—happy marriages brought about thin, as we have done, and judge for themselves. It is impossible to doubt the evidence of the senses, and the voluntary testimony of multitudes.
